

Tasse de thé

the 1990s, the number of people in the world who are poor has increased. The number of people who live on less than \$1 a day has increased from 1.2 billion in 1981 to 1.5 billion in 1998.

There are a number of reasons why the number of people who are poor has increased. One reason is that the world's population has increased. In 1981, there were about 5 billion people in the world. In 1998, there were about 6 billion people in the world.

Another reason why the number of people who are poor has increased is that the world's economy has not grown fast enough. The world's economy has grown, but not fast enough to keep up with the world's population. This means that the world's economy is not producing enough goods and services to meet the needs of all the people in the world.

A third reason why the number of people who are poor has increased is that the world's resources are being used up. The world's resources, such as oil, coal, and natural gas, are being used up. This means that the world's economy is not producing enough goods and services to meet the needs of all the people in the world.

There are a number of things that can be done to reduce the number of people who are poor. One thing that can be done is to increase the world's economy. This can be done by increasing the world's production of goods and services. This can be done by increasing the world's investment in infrastructure, such as roads, bridges, and schools.

Another thing that can be done is to conserve the world's resources. This can be done by using resources more efficiently. This can be done by using less energy, less water, and less land. This can be done by using renewable resources, such as solar energy, wind energy, and biomass.

A third thing that can be done is to help the poor. This can be done by providing the poor with access to education, health care, and other social services. This can be done by providing the poor with access to credit and other financial services. This can be done by providing the poor with access to land and other resources.

There are a number of things that can be done to reduce the number of people who are poor. It is important that we all work together to make the world a better place for everyone.

the 1990s, the number of people in the world who are illiterate has increased from 500 million to 700 million.

There are many reasons for this. One is that the population of the world is growing so fast that the number of people who are illiterate is increasing. Another reason is that the quality of education is so poor that many people who are literate are unable to read and write.

There are many ways to reduce illiteracy. One way is to improve the quality of education. Another way is to provide more opportunities for people to learn to read and write.

There are many ways to improve the quality of education. One way is to provide more teachers. Another way is to provide more materials.

There are many ways to provide more opportunities for people to learn to read and write. One way is to provide more schools. Another way is to provide more classes.

There are many ways to provide more schools. One way is to build more schools. Another way is to provide more teachers.

There are many ways to provide more classes. One way is to provide more materials. Another way is to provide more teachers.

There are many ways to provide more materials. One way is to provide more books. Another way is to provide more papers.

There are many ways to provide more books. One way is to provide more libraries. Another way is to provide more teachers.

There are many ways to provide more libraries. One way is to build more libraries. Another way is to provide more books.

There are many ways to provide more books. One way is to provide more papers. Another way is to provide more teachers.
