

The Agroecology Game

Undertake the challenges of the Agroecology! Find solutions (cover crops, collective projects, mixed crop-livestock farming, leguminous plants...) to problems related to nowadays agriculture (ground erosion, biodiversity loss, volatile agriculture prices, processed food...).

AGROCHALLENGES allows you to build knowledge and be aware of the concept of Agroecology. It can be played alone or in teams through the different play modes (competitive, cooperative, strategic). Share your knowledge and prove your ideas in discussions of the following issues: economic, environmental, social, food and territorial problems of the transition of agroecology.
